

Candida-G and Flora-G Plus Testimonials

Rosacea Clears Up: I've been given antibiotic therapy many times throughout my life and have been told that I need to take probiotics because of it. In the past, when I've taken acidophilus, etc., I didn't feel that it made a bit of difference. I want you to know that your Flora-G Plus is the only probiotic that I have ever taken that has given me "die-off" (I felt tired for the first day or two), so I knew it is of really excellent quality. Also, as soon as I started taking Flora-G Plus I noticed that I had less gas and bloating after eating. After a few months my sensitive bowel problems disappeared completely. And now, after eight months of taking it, my energy lasts all day, my head is clear and a patch of itchy skin on my ankle is gone. My appetite is less and my bowel function is better than I've ever experienced. Also, I began to take Candida-G as soon as it became available in July and in a few days my skin looked better and felt softer. I also mix it with water and spray it on my face and body after my shower. After rubbing a thick mixture of it on my dry, cracked heels morning and night for a few days they became soft and smooth. My husband sprays it on his skin too and the Rosacea on his face has cleared up. Ann, Belmont, CA

Sinus Infection Goes Away: I had oral surgery on July 31st and the dentist said I would have to be very careful not to get a sinus infection because if I did it would interfere with the healing of my jawbone. He said he had to remove the floor of the sinus to remove all the dead bone from my jawbone. On August 14th I woke up feeling like I had a sinus infection and later that day my mom brought home a bottle of Candida-G and asked me to try it. She thought it would heal the sinus infection if I made a solution of one capsule to 3 ounces of distilled water and sprayed it up my nose. I was willing to try anything so I did it and to my amazement it cleared up my sinuses right away. Needless to say that convinced me to keep spraying it up my nose every day and to this day, 2½ months later, it has kept my sinuses clear. When I spray it in my mouth it clears up sores from my dentures right away, too, and they don't turn into canker sores like they used to. I'm taking lots of Flora-G Plus and Candida-G internally, too. Now that my jawbone is free of infected bone, due to having my last surgery for dental osteomyelitis (infected and dead bone in the jawbone), I need all the help I can get to get rid of the bad bacteria that spread from my jawbone to my lymph system. I'm positive Candida-G is saving my life. Sandra Petry, Walnut Creek, CA

Earache Heals: I got rid of an earache just by spraying a solution of Candida-G and distilled water in my mouth a few times. I had accidentally cut my upper right gum while flossing my teeth. Two days later the cut had not yet healed and I noticed an earache was developing in my right ear. The next day the earache was worse and I decided to see if the Candida-G solution would help (this was the day after I brought it home for Sandy to use for her sinus infection). The cut healed that day and the earache was gone the next morning. Gargling with the solution has also removed an abscess on my gum that had been worrying me. That convinced me to gargle with it after flossing and brushing my teeth twice a day. I'm taking 8 Flora-G Plus capsules and 3 Candida-G capsules a day to keep my colon healthy and I'm gargling with Candida-G to prevent any bad bacteria in my mouth from causing trouble elsewhere in my body. Who hasn't wondered what they could do to protect themselves when they've read reports like these in newspapers and magazines: "The bacteria present in gum diseases may trigger blood clots, which can contribute to a heart attack or stroke, researchers reported on February 16, 1998." and "A study found that 85 percent of heart-attack patients had periodontal disease." Now we know what to do; gargle with Candida-G! Bonnie O'Sullivan, Walnut Creek, CA See reverse side for purchase options.
