

## DENALITOX USAGE

We have had a huge response to our newest product DENaliTOX and with that excitement we have had the question, "What is the best way to take DENaliTOX?"

This remarkable and powerful product was created with simplicity in mind. You can take this powerhouse anywhere! There is no taste, no aftertaste, and does not need to be refrigerated so it is easy to take anywhere.

**Recommended usage:** 3 to 5 drops 3 times daily. Place the drops under the tongue directly and hold for 20 seconds before swallowing.

**WARNING: DO NOT TAKE THIS PRODUCT WITH FOOD, WATER OR ANY OTHER SUBSTANCE.**

For optimal effect: When taking your DENaliTOX drops make sure that you do not take within 15 minutes before or after food including gum, brushing teeth, or any other substance of any kind. DENaliTOX is specifically formulated and mixing it with anything can change the chemistry and you may lose the benefits associated with using DENaliTOX. Because you use it directly under the tongue it allows for quick absorption and therefore it will have its desired effect. Take the DENaliTOX 15 minutes BEFORE or AFTER food, water, or any other substance.

**NOTE:** For those in a compromised health state, we recommend that you use 1-2 drops your first day and see how your body responds. Some people may require starting off slowly and working up to taking 2 drops 2x's daily three times a week. As you feel stronger and better than you can move towards the recommended dosages.
